No. is the number of results predicted by chance to have a
core greater than or equal to the accors of the result being printed,
and is derived by analysis of the cotal score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 327

This invention entailes to a moral ambout for presenting or treating stin
conditions characterised by increased "oil activation and abnormal
entition presentation in the densi and epidemia; The method comeries
inflation of washing-prophory a insention associated antique; and
inflation of the DZ/LAS, increased.

Inflation of the Inflation of Inflati
                                                                                                                                                                                                                                                                                                                                 Treating conditions characterises by increases T real activation and demonstrate and attent presentation in the decrais and epidermis, e.g. attopic demantitis, villilgo and UV damage, by administering an inhibitor of the CON/LRA 3 interaction.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      61 DKVABLENSEFRAFSSFKNRVYLDTVSGSLTIYNLTSSDEDRYEMBSPNITDTMKFFLYV 120
